## **Report on ITM**

Faculty Name : Ms. Neha Hasan
Year/Semester: III-I
Course: Operating Systems
Adopted Teaching Methodology: Brain Storming
Date: 12-12-22

Topic: Scheduling Algorithms

## **Description:**

Brainstorms typically have three steps: idea capture, discussion and critique, and selection. The following strategies will help you and your team, whether you're in person or remote, through all three stages.

## What are the different types of CPU Scheduling Algorithms?

There are mainly two types of scheduling methods:

- Preemptive Scheduling: Preemptive scheduling is used when a process switches from running state to ready state or from the waiting state to the ready state.
- Non-Preemptive Scheduling: Non-Preemptive scheduling is used when a process terminates, or when a process switches from running state to waiting state.
